Your search returned no results

You may modify your search: [Modify Search](#)

Why were there no results?

There are many possible reasons why your search might not have found anything. Some of these are:

- The article for which you are searching may be of a type that you did not select. Your search included only "articles". You may also wish to include one or more of "other items", "opinion pieces", and "reviews".
- The JSTOR search looks for individual words or phrases. Your search term(s) include the phrase "workflow management system." If you were instead looking for articles with the individual words "workflow", "management", or "system", you should place the words into separate search boxes in the search form. To find only articles containing ALL the words, you should select "AND" between the boxes, and "Full-Text" for each individual box. To find articles containing ANY of the words, select "OR" between the boxes.
- The word(s) or phrase(s) for which you searched may not be present in the selected journals.
- If you have a fairly precise citation for an article, you may wish to [browse](#) to find it instead.
